Practical: 1

(Introduction to Data Structure and String)

Sr.No	Definition
1	WAP to insert 10 elements in array and display it.
2	Implement array using row major order and column major order.
3	Implement Sequential search algorithms.
4	Implement Binary search algorithm
5	Implement a program to find length of a string without using library function.
6	Implement a program to copy one string to another without using library function.
7	Implement a program to reverse the given string without using library function.
8	Implement a program to compare of two given strings without using library function.
9	Implement a program to merge (concatenation) two strings without using library function.
10	Implement a program to find sub-string form given string without using library function.
